

MOHAVE COUNTY MINER.

Special notices in the reading columns of the Miner will be charged at the rate of Ten Cents per line for each insertion.

J. Weyl, Notary Public, room 5, Bank of Arizona Building, Prescott, is the authorized agent of the MOHAVE COUNTY MINER in Yavapai county.

MINERAL PARK, FEBRUARY 11 1883

Multum News in Parvo Type.

John E. Ryan was in town last Friday.

L. S. Welton is expected home in a day or two for a few days visit.

Dan Holloway arrived on the stage Tuesday evening from Prescott.

R. G. Patterson and Sol. C. Rowe came in from Gold Basin Wednesday.

W. J. Chamberlain of the sampling works was in town last Tuesday on business.

If you want a primo steak now is the time to get one at James Smith's butcher shop.

William Roe has gone to the end of the track after a load of freight for Hyde & Watkins.

We are sorry to hear that W. J. Chamberlain has been quite indisposed during the past few days.

William Innes and Wellington Starkey came in on Wednesday with a band of cattle for our butcher.

Sheriff Stoen and Otto Kuencer have gone to the Needles on business connected with the Sheriff's office.

The recent snowfall seems to have been general all over the country. The stock men are all feeling good over it.

W. H. Hardy has been to the end of the track during the past week straightening out matters connected with his stage line.

We hear that A. E. Davis will start back in about two weeks and that B. H. Spear will return with him if he is well enough to stand the journey.

The citizens of Hackberry want a hospital erected at that place at the expense of the county. How would it do to turn that school house into a hospital.

Jack Johnson has had a new brand made. It is composed principally of potatoes and a man will have to stand on his head to read it, or else turn the cattle upside down.

Four passengers came in from the railroad on Monday's stage bound for the Needles. They procured a team from Chas. Gross and went right on to their destination.

William Roe drove into town on Wednesday morning with a load of oranges, lemons, limes and honey which found a ready sale at prices which ought to be very remunerative to him.

E. L. Morey arrived in town last night from Prescott accompanied by a Mr. Alkin. We are pleased to hear that Mr. Morey has come to stay and that he will engage in business in this country.

B. H. Spear is still lying quite sick in San Bernardino. About ten days ago he was so low that he was not expected to live, but we learn that he is now on the mend and hopes to be able to start for Mineral Park in a week or so.

Sam. Perdy was brought over from Yuma last Tuesday by Deputy United States Marshall. W. Evans, to answer to the charge of issuing fraudulent declaration of naturalization papers at the recent election.—Phoenix Gazette.

John K. Mackenzie, administrator of the estate of Thos. Ralston, has filed a petition in the Probate Court for an order to sell the real estate belonging to the estate, which consists of an interest in the T. Y. L. and other mines in this district.

The roof of the Court House caught fire last Monday morning from a stovepipe in the District Attorney's office. The prompt application of a few buckets of water, however, put it out and averted what might have been a serious conflagration.

Suit has been commenced in the Justice's Court by T. J. Christie against James Dundon to recover the sum of \$66.25 alleged to be due from defendant to plaintiff. The trial has been set for Saturday, 14th inst. Jurymen out of a job may apply at this office and subscribe for the paper.

Chas. L. Roe was in town last Tuesday from Stockton. He tells us he came to buy some legal cap for Dave Southwick, who is engaged in drawing up the prospectus and articles of incorporation of the Wallapai Valley & Stockton branch railroad; David Southwick, General Superintendent.

H. C. Stevens has been awarded the contract for carrying the mail from Signal to Mineral Park for three years at \$2750 per year. We presume from the price, it will be a weekly service. Stevens is a Star Route contractor of Kansas City and has contracts in Wyoming, Arizona, Idaho and Nevada.

The Board of Supervisors held a meeting last Monday evening, but transacted little or no business, and finally adjourned till Saturday, in the hope of being able to get W. H. Hardy, the chairman of the Board, to attend and help audit the numerous bills which have accumulated during the past month.

The objections to Masterson's bill making county taxes payable one-half in warrants and orders on the General Fund, are that they would give equality to the holder of late warrants and certificates with those of older date, and again, the General Fund of some counties, when the taxes were collected, might be without funds to meet its running expenses. In the latter case the predicament would not be easily passed over. It is held that these objections are vital, and that the bill should not become a law.—Gazette.

Col. B. Moses returned from his exploring expedition through the mining districts in the vicinity of Mineral Park, Arizona. Before visiting the camp Mr. Moses had seen numerous specimens of ore taken from the mines in that vicinity and he went there to see if the wonderful stories told of the richness of the mines were really true. He has carefully examined the country and is deeply impressed with the value of the mines. He says that the world has no idea of the wealth which lies hidden in the mountains of Mohave county, and he predicts that it will soon show up the richest mineral ever yet produced in large quantities. Mr. Moses secured five claims in the immediate vicinity of Mineral Park and he has such unbounded faith in the possibilities of the country that he proposes to develop them as rapidly as his means will allow.—Albuquerque Journal.

OUR MINES.

A REPRESENTATIVE MINE ON STOCKTON HILL.

One of the best developed claims on Stockton Hill is the Infalible, better known as the Indian Boy mine. This claim was located as far back as the year 1865, when the district was known as the Sacramento district, and is now owned by Philip Hach, David Southwick and J. K. Mackenzie. The ledge runs north and south and is nearly perpendicular and averages about three feet in width. The pay streak averages about 18 inches, sometimes extending across the full width of the vein and then again pinching down to 8 inches, but never less than that. The general character of the ore is heavy galena, carrying from 40 to 50 per cent. lead, with considerable zinc-blend and iron.

As to the average value of the ore from this claim, a good idea can be formed from what has been already mined. A lot of eighteen tons, shipped to San Francisco, went one hundred and thirty-one dollars per ton in gold and silver, carrying at the same time 44 per cent. lead. Another lot of five tons worked at the Mineral Park mill went one hundred and eighty-six dollars per ton, no allowance being made for the lead. Another lot of twenty-four tons, smelted at the Cerbat furnace, went one hundred and twenty-nine dollars per ton. From this it will be seen that the ore from this mine carries a much higher percentage of gold and silver than is usually found in veins of galena ore of this size. There is now on the dump at the mine from seventy-five to one hundred tons of good looking ore which will go, from numerous samples which have been made from it, about seventy to eighty dollars per ton without sorting, the bulk of it being ore that would not pay to mill or ship in former years but has now become quite valuable. The mine has been opened by three shafts, the main one being fifty-two feet deep, another one thirty feet and another twenty-five feet. From the main shaft at the fifty foot level a drift has been started to connect two of the shafts together and has been run in a distance of fifty feet out of the seventy-five required to make the connection. Altogether some two hundred tons of ore have been taken out of this mine, which is a splendid showing for the amount of work done on the mine and shows conclusively that this will become a good paying mine whenever its owners see fit to open it up in good shape, in fact this mine has paid, and paid well, for all the work ever done on it. We understand it is the intention of the owners this coming spring to ship the ore to Denver in one hundred ton lots and that arrangements are now being made with Chamberlain & Co. to that effect.

CORRESPONDENCE.

HACKBERRY, A. T. February 8, 1883.

EDITOR MOHAVE COUNTY MINER:—For ways that are peculiar and tricks that are dubious the tenderfoot prospectors are peculiar, an average one can tell more about the dips, spurs and angles, width and extent of ledges, quantity and quality of ores and rock, cash value of the same, and, above all, the amount of development necessary in order to stock a \$40 bonanza for half a million. Our old tried and true prospectors who have grown up with the country, who have learned to live on beans straight and a deer skin for months, who have followed the burro through the terra incognita of our Indian country, who have fought and bled and maybe died that the future generations may reap the reward of lives passed or spent in a struggle to force nature to yield up its hidden treasures, must, in the estimation of tenderfoot heros of one thousand free hash dumps, take a back seat and applaud the prosperity of their mines. Of the tenderfoot pioneer corps of mineral wealth seekers, we are willing to give all their just due for intelligence and energy, but in all decency's sake we hope that the new men coming among us will not set us up as fools even if we have been in Arizona long enough to tell the difference between a jack rabbit and a jackass.

Local news in our town is hardly worthy of mention. Several people are on the sick list and one or two seriously ill. We have put up a hospital for future emergencies and all are standing in with each other for "pro bono publico" and self protection. If the authorities will do us the justice of their counsel and aid we may avoid an epidemic of any disease.

Our Indian neighbors have gone to the mountains and our streets are now seldom decorated with the variegated hues of the dusky maidens' scanty habiliments and the railroads deliver our now seldom tangles to the musical laugh of the Wallapai squaw.

There is some talk here of forming a stock company who intend claiming a square mile of land near or perhaps adjoining the prospective new county seat or near Red Springs or Kingman, and starting a lizzard development or-operative enterprise. The projectors are solid and rank from Kaiser Comrade through intermediate grades of generals down to the lesser operatives whose rank is yet undetermined. We have figured the profits on some four million lizzards and feel satisfied there is money in the scheme and besides the company will sell town lots, build brush houses and of course improve a great deal by disturbing the rocks in the search after our stock. It is proposed to have a propagating house directly at the siding and from there a subterranean passage through Kingman direct to a monstrous coral where our lizzards are to be fed, clothed and subequently skinned, each skin now is worth from nil to a sum I will not dare mention. All applications for stock in this enterprise can be made to myself, who will remain and grow up with the country.

INCognito.

RAILROAD ITEMS.

Col. Shanfield appears to be doing a good business selling town lots at Kingman.

John Ryan's fine new lumber house at Kingman is nearly completed.

Two large mess tents and seven small ones were put up at Kingman one day last week.

About three hundred men are employed at the A. & P. shops in Albuquerque.

The A. & P. railroad company has just received two more new locomotives making a total of forty-eight locomotives in all on the road.

The rates for passenger traffic on the Atlantic & Pacific railroad will be reduced from ten cents per mile to eight cents per

mile Feb. 1st. It is quite probable that the rate will be still further reduced to six cents per mile by May 1st. This reduction has been made by the officers of the road without solicitation and speaks well for the company's liberality.—Democrat.

A new time table went into effect on the Atlantic & Pacific railroad on February 2d, and better time is made by passenger trains. The passenger train leaves Albuquerque in the evening instead of in the morning.

Articles of incorporation have been filed with the County Clerk of San Francisco by the San Francisco and Colorado River Railroad Company for the purpose of building a railroad from the mouth of the estuary of San Antonio to a point at or near where the thirty-fifth parallel intersects the Colorado river. This enterprise is, in fact, nothing more than a legitimate extension of the South Pacific Coast system now in operation. The capital stock of said company is \$20,000,000, divided into 200,000 shares of \$100 each. The articles set forth that at least 10 per cent. of the capital stock subscribed, to wit, \$100,000, has been paid into the treasury of the corporation. A. E. Davis has been elected Treasurer. The Directors are A. E. Davis, Ayaschoh Groves, Charles Iverson, George C. Prentiss and R. M. Garrett. These names mean success for the enterprise.—San Jose Mercury.

Grant & McDonald have secured a ten mile contract on the other side of the river and are advertising for 250 extra men at \$2.50 per day.

We presume that the grade of the A. & P. road near the Needles will be changed, as the place where Grant & McDonald are already working on their ten mile contract across the river is at a point about half way between Fort Mohave and the Needles, so we are informed by Capt. Layne.

MINING ITEMS.

James Mulligan and John Boulware are working on the Crescent mine in the Peacock Mountains.

We understand that Dr. Brown intends to put a force of men at work on the Ithaca mine very shortly.

Col. Thornlow has about twenty tons of very high grade ore from his mine, the Crescent, already hauled to the Hackberry mill. He has one of the best paying mines in the county.

Wm. Rumpf is in town from the Crescent mine, where he has been working steadily for the past five months. He reports the mine looking splendidly.

We hear that Sol Rowe is going to open up the Golden Rule mine in good shape.

L. C. Welbourn is taking out some rock from the Setting Sun that will assay away up in the hundreds.

Johnny Kennedy and P. Hach are still sinking on the foot wall of the Black Warrior at Stockton and don't propose to stop till they get down one hundred feet.

Seneca Shoulters, who used to own the American Flag mine at Wallapai Mountain, is in town.

Johnson, Burke and Snyder have taken out about three tons of good looking ore from the C. O. D. mine the past week.

We hear that John Barry is going into mining on a large scale this summer and that he will probably erect concentrating works of his own.

A. S. Bush and Steve Smith have just finished a contract on the Juno at Chloride for Weldon & Grounds. They say that the mine is looking better than ever and that there is any amount of good paying ore in sight.

We clip the following from the Albuquerque Democrat:

W. E. Talbot has purchased a corner lot at Kingman, A. T., for \$200. Mr. Shenfield who represents the town site company left for the front this morning, and will return in about two weeks, when he will quarter at the Ballingall prepared to make the proper conveyances.

NOTICE.—All parties are hereby warned that M. Pabst has no interest in the claims located in Mineral Park, A. T., by B. Moses and Wm. F. Singer, having violated his contract with said parties, and therefore has no right to dispose of any part thereof.

B. MOSES.

Wm. F. SINGER.

Albuquerque, Jan. 31, 1883.

LOCAL COAL BURN.—C. L. Hubbs reports that a vein of soft coal has been found within thirty miles of Albuquerque, which is eleven feet in thickness. This is undoubtedly the largest coal deposit yet discovered in the western country. Its value to the commercial interests of Albuquerque will be incalculable. At present the nearest coal beds are at Gallup on the A. & P. road, while a considerable quantity of the article is brought down from Rosabury for consumption here. The exact location of this new discovery is not made known just yet, but near it is a very rich vein of copper ore.

A Yuma dispatch says: "A noted Cochise county horse thief, sentenced to ten years, escaped from the penitentiary Friday night. No one seems able to give any information as to how the escape was effected. He was not locked in the cell with the others, and the affair has a very suspicious look. The Superintendent was confined to his bed, suffering from his last drunken spree.—From the manner in which affairs are conducted at the prison, it is feared there may at any time be a successful general outbreak."

Dr. SPINNEY.

NO. 11 KEARNY STREET.

Treats all Chronic and Special Diseases.

YOUNG MEN

Who may be suffering from the effects of youthful follies or indiscretion will do well to avail themselves of this, the greatest benefit ever laid at the altar of suffering humanity. Dr. Spinney will guarantee to forfeit \$500 for every case of Seminal Weakness or private disease of any kind or character which he undertakes and fails to cure.

MIDDLE-AGED MEN.

There are many at the age of thirty to sixty who are troubled with too frequent evacuations of the bladder, often accompanied by a slight stinging or burning sensation and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposit a rapid sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin milkish hue, again changing to a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.

Office Hours—10 to 4 and 6 to 8. Sundays from 10 to 11 A. M. Consultation free. Thorough examination and advice, \$5.

Call or address

DR. SPINNEY & CO.,
dealt No. 11 Kearny St., San Francisco.

To All Whom It May Concern: Notice is hereby given that on the 10th day of February, A. D. 1882, at Prescott, an application will be made to the Hon. F. A. Tittle, Governor of the Territory of Arizona, to pardon Charles Setzophant and Edward Farmer, now confined in the Territorial Prison at Yuma, for the crime of robbery.

SAM'L. HAMLTON.
Mineral Park, Jan. 13th, 1883.

Lost, Strayed or Stolen.

Left the premises of the undersigned, some four months ago, one L. Wollenberg, who may be identified from the following description: Height 5 feet 7 inches, stoop-shouldered, short necked, bullet headed, with black hair and Hebrew nose, weighing about 175 pounds, and in general appearance bearing a remarkable resemblance to an Arizona ex-legislator. A liberal reward will be paid by the undersigned for any knowledge of his whereabouts, dead or alive.

CHARLES COHEN.

Gold and Silver Bullion
Melted into Bars
And Stamped.
Deputy U. S. Mineral Surveyor.

GEORGE H. CURRY,
Watchmaker and Dealer in
WATCHES, CLOCKS, JEWELRY, SILVERWARE,
Spectacles and Eye Glasses.

Also agent for Royal St. John Sewing Machine.
Largest Line of Guns, Pistols and Ammunition in Northern Arizona.
Prescott, A. T.

Notice of Forfeiture.

To John M. Martin, William Flagg, James J. Faye, J. Oppenheim, John Doe, Richard Roe, John Sykes, Robert Sykes and others whose names are unknown to the undersigned, who claim a title to the property hereinafter described, or hold any stock in a certain corporation, incorporated under the laws of the state of New York, under the name and style of the "Fairfield and Cincinnati Mining Company," and whose principal place of business is in the City of New York, or to any person or persons who have purchased any claim, stock, right, title or interest of any description in and to the following described mining property, situate, lying and being in Wallapai mining district, county of Mohave, Territory of Arizona, and described as follows, to wit: These three certain mining claims known and described as the Fairfield, Cincinnati and Cincinnati Northern; also the Fairfield Tunnel site; You are hereby notified that I have performed the assessment work for the year 1882, consisting of One Hundred (\$100) dollars worth of work, upon each of the above described claims. I have also furnished tools, powder, fuse, rope, windlass, charcoal, etc., necessary for performing the said work, to the amount of Two Hundred and Fifty (\$250) dollars. The above amount of work being necessary to be done in order to hold said claims for one year under the provisions of Section 2324, Revised Statutes of the United States. I have also paid the County and Territorial taxes for the year 1882 upon the personal property belonging to said corporation to the amount of Twelve (\$12) dollars. And if within ninety days after the first publication of this notice, you fail, refuse or neglect to contribute your proportion of such expenditure as co-owner, or by virtue of any right of redemption as a lienholder, your interest in either of said claims will become the property of the undersigned, under said Section 2324.

W. H. HARDY.

Mineral Park, Mohave county, Arizona Territory, February 1st, 1883. 14130

NOTICE TO CREDITORS.

Estate of
U. E. Doolittle,
Deceased.

Notice is hereby given by the undersigned Public Administrator of Mohave county, Arizona Territory and administrator of said estate to the creditors of and all persons having claims against said deceased, to exhibit the same with the necessary vouchers within ten months from the first publication of this notice, to the undersigned in the office of J. W. Stephenson, attorney at law, at Mineral Park, Mohave county, A. T.

Dated at Mineral Park, A. T., February 1st, 1883.

JAMES J. HYDE,

Public Administrator.

J. W. STEPHENSON,

Attorney for Administrator.

Invalids, broken down in health and spirits by chronic dyspepsia, or suffering from the terrible exhaustion that follows the attacks of acute disease, the testimony of thousands who have been raised as by a miracle from a similar state of prostration by Hostetter's Stomach Bitters, is a sure guarantee that by the same means you, too, can be strengthened and restored.

For sale by all Druggists and Dealers generally.
